## Objective

Solution Oriented and problem solver with 1+ years of experience in building and maintaining websites. And as a frontend web developer i am proficient in languages like HTML, CSS (like Tailwind CSS), JavaScript and modern libraries like React JS. Also learning more ways to create web applications in more innovative and effective way. Team player and enthusiastic go-getter. Individual with a pleasant personality

## Experience

- **Naik Technology**  
React Js Developer  
I am responsible for developing fully responsive and interactive websites and integrating APIs from the backend. Also understanding more innovative and effective ways to create websites and web application

## Skills

- HTML
- CSS
- Tailwind CSS
- JavaScript
- Typescript
- React Js
- Redux

## Projects

- **VVCMC Case management system**  
It was based on case management on government which were previously done on paper work to track on going cases on government and now to bring those cases online to provide easy and speedy solutions of the cases
- **MSLMS**  
It is also based on case management on government which were previously done on paper work to track on going cases on government and now to bring those cases online to provide easy and speedy solutions of the cases, but the exception is that this project is used to track on the whole Maharashtra state government cases
- **IT Inventory**  
This is a web based application for the purpose of tracking inventory supplies that are given to the government employees such as mouse, keyboard, PC's and much more. It is also provides a way to track those supplies on where they are rented out by generating their invoices.
- **Revenue department of Maharashtra**  
This is a web based application which provides brief information on the government of Maharashtra by providing their upcoming programs and schemes.
- **MSEDCL Land transfer application**  
This is a web based application which provides information about the requirement of lands and their acquisitions of the land for providing electricity by sub stations and also it checks about the documents status for different status for land acquisition which was done offline where by bringing this system online will provide solutions at ease.

## Education

- **Viva college**  
B.Sc Computer Science  
8.05
